Advantech Product FAQ

NMC-4006 NVM upgrade from V5.05/6.01 to V6.80

Applicable model list	NMC-4006 series				
Nodel name version N/A					
NVM Version	V6.80 (0x80004315)				
Attention please:					
The nvmupdate utility only su	pports NMC's NVM upgraded, it doesn't support NVM downgraded.				
Description:					
1. Following step is upgrading NMC-4006 NVM from NVM 5.05 (0x80002b39) or NVM V6.01 (0x80003ed					
to V6.80 (0x80004315) by I	ntel nvmupdate utility (Linux Version).				
Flashing step:					
1. We recommend customer to execute NMC-4006 NVM upgrading in CentOS 7(Kernel 3.10.0)					
2. Please decompress NMC-40	006_V680.tgz in Linux and into NMC-4006_V680 folder				
2 Planco kov in following com	nmand to check NMC-4006 NVM version,				
5. Flease key-ill following coll					
, c
